

Barcode Guide.

In order to expedite the receiving process for your materials, and to make sure we are able to get your samples inventoried and available on Material Bank as fast as possible, we ask our Brand Partners to barcode each sample.

Details

1. We support any type of one-dimensional barcode like the following:
 - Code 128 (standard)
 - Code 39
 - UPC
 - EAN
2. We do not support two-dimensional barcodes such as QR codes.

Barcode Guide.

3. Minimum barcode size (8 × 25mm, no max)

(a)

We recommend that your barcode reads to your manufacturer SKU or Material Bank SKU. If your barcode does not do so, we ask that you provide the correlation to what each barcode reads per SKU.

(b)

If you don't know how to create a barcode for your label, we recommend using an online barcode generator to create one. For an example of a barcode generator, [click here](#).
