SFTP enrollment.

In addition to receiving daily lead information via CSV files, Material Bank offers XML files through our secured FTP. These files can be used to integrate with your company's CRM.

Overview
- Use SSH format to generate a key pair
- Distribute public SSH key to Material Bank client services
- Log in using username, URL, and private key

Enrollment
Submit this form to your Account Manager. We will use your preferred communication method to arrange the testing of your file integration within one to two business days.
